SPONSORSHIP OPPORTUNITIES 2024–2025 Program

ABOUT THE COMPETITION

JUMP into STEM is a nationwide competition for undergraduate and graduate students at US academic institutions that aims to inspire the next generation of building scientists. With diversity at the forefront of the program, JUMP into STEM emphasizes the inclusion of an interdisciplinary mix of majors (such as architecture, computer science, mathematics, economics, policy, engineering) and students from groups underrepresented in the building science field.

WHY SPONSOR?

Our sponsors support a diversity-focused student competition that attracts a pool of talented students from a wide range of backgrounds who are preparing to join the workforce. Sponsor visibility extends to professionals from the US Department of Energy, national laboratories, and academia. For the 2023–2024 Challenge Competition, 267 students from 38 universities across the US submitted their novel ideas.

Sponsors provide undesignated funds to support JUMP into STEM and to enable the inclusion of more students and expansion of events at the Final Competition annually in January. Final Competition winners receive 10-week paid summer internships at the National Renewable Energy Laboratory, Oak Ridge National Laboratory, or Pacific Northwest National Laboratory.

This year's top teams, professors, and sponsors will be invited to attend the in-person Final Competition, scheduled for January 30–31, 2025, at the National Renewable Energy Laboratory in Golden, Colorado.

ENGAGEMENT BEYOND THE CLASSROOM

Together, industry sponsors and competition organizers provide an outstanding environment and opportunity to engage beyond the classroom. This year up to three Gold and Platinum Sponsors will have the opportunity to participate in the 2025 Industry Partner Visit. Interns from each lab will visit the partner facilities for 2 days of activities, tours, and presentations.

Learn more at www.jumpintostem.org.

LEVELS OF SPONSORSHIP

- **Platinum:** \$20,000
Gold benefits plus opportunity to name a winning internship slot on behalf of your company (i.e., Company XYZ Internship Winner)
- **Gold:** \$12,000
Silver benefits, plus invitation to participate as a judge during the competition and eligibility for the JUMP into STEM Industry Partner Visit program
- **Silver:** \$6,000
Bronze benefits plus invitation to the Final Competition
- **Bronze:** \$2,500
Organizational logo on JUMP into STEM website and communications materials, including the Final Competition program and results articles distributed to 40,000+ recipients

INDUSTRY PARTNER VISIT OPPORTUNITY

SUMMER 2025 PROGRAM

Following the success of previous visits, JUMP into STEM is continuing the Industry Partner Visit opportunity for talented JUMP into STEM interns and up to three industry partners. This 2-day event allows select 2024–2025 JUMP into STEM Gold and Platinum Sponsors to bring competition winners to their facility for direct engagement.

With a focus on illustrating the roles and capabilities of industry in technology commercialization, the Industry Partner Visit includes in-person tours, networking sessions, and activities specific to the Industry Partner. The visit takes place during the interns' 10-week national laboratory internships. The JUMP into STEM management team works directly with each Industry Partner to organize and plan a visit unique to that partner.

For summer 2025, we are looking for up to three Industry Partners (2024–2025 Gold or Platinum Sponsors) to engage with national lab student interns. Contact us today to learn more!
